II. MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

In the first half of 2020, the global spread of COVID-19 pandemic, the ongoing trade disputes and the escalation of geopolitical tensions have posed severe challenges to the global economic development.

Under the pandemic, household consumption, automobile sales, corporate investment, and commodity exports in countries around the world have been reduced to a large extent, creating a negative impact to the industry in which the Company operates. In the domestic market, according to the statistics from China Association of Automobile Manufacturers, overall vehicle sales in China in the first half of 2020 were 10.257 million units, representing a decrease of 16.9% from the same period of last year. Of which, sales of passenger vehicles and new energy vehicles fell by as much as 22.4% and 37.4%. However, facilitated by the smooth implementation of the Group's intelligent online marketing training system in response to the pandemic and the continued popularity of the new generation of Pad V and Pro5, sales in the domestic market in the first half of 2020 recorded an increase of 3.1% from the same period last year to RMB220 million. In overseas markets, due to the lockdown and suspension of operation at the beginning of the year, sales orders could not be delivered in time. After the resumption of work, various countries have adopted various levels of restrictive prevention and control measures when the COVID-19 pandemic spread across the globe, which caused diminishing demand for orders. As a result, the Group's export sales revenue in the first half of 2020 decreased by 19.2% from the same period last year to RMB150 million. Overall, in the first half of 2020, the Group's sales revenue decreased by 7.9% from the same period last year to RMB390 million; due to the decline in the proportion of overseas business revenue with higher margin, the gross profit margin dropped slightly by 1.1 percentage points to 44.2%. Expenses during the period increased by 23% compared to the same period last year, mainly due to the substantial increase in R&D expenses as the Company is in the transformation phase in terms of product structure, business model and competition strategy. Therefore, the Group recorded a net profit attributable to owners of the parent company of RMB-25.98 million in the first half of 2020, compared with a net profit attributable to owners of the parent company of RMB38.76 million in the same period last year.

As the COVID-19 pandemic eased in China, the overall operating efficiency of the Group began to recover in an orderly manner in the second quarter and various businesses gradually improved, enabling a healthy recovery of its growth trend recovered healthily.

- (i) Car diagnostic equipment business: The new generation of high-end Pad V has excellent diagnostic capabilities with focus on high-end applications such as intelligent diagnosis, online programming, and remote diagnosis, supporting extended functions such as oscilloscopes, sensors, multimeters, battery detection, and endoscopes and for the first time integrated Smartlink's super remote diagnosis function, which has been widely recognized by customers; the TSGUN portable tire pressure detection handheld terminal, being the first of its kind in the world, integrates the activation, reading, learning and programming functions of the TPMS sensor, and directly connects to the X431 via Bluetooth/Wifi, which effectively expanded related functions of TPMS of comprehensive diagnostic equipment.

- (ii) Diagnostic software business: The intelligence pricing and software granulation mode were successfully promoted and applied as the software mall was officially launched, supporting a year-on-year increase of 35% in the Group's diagnostic software business revenue in the first half of the year.
- (iii) Big data business: A total of approximately 85 million vehicle diagnostic reports were collected this year, representing a year-on-year increase of 16%. As of 30 June 2020, a total of 555 million maintenance diagnostic reports were accumulated, representing an increase of 18% over the end of the previous year.
- (iv) Patent progress of core technologies: as of 30 June 2020, the Group has received 458 patents granted by the State, including 304 invention patents; 2,215 out of 2,428 patents under current applications are invention patents; 177 certified software copyrights obtained and 338 PCT patents has been applied.

OUTLOOK AND FUTURE STRATEGIES

The outbreak of COVID-19 in early 2020 has brought a major negative impact to the global political and economic situation. Despite China's outstanding success in epidemic prevention and control as well as the recovering economic growth in the second quarter, it is still not optimistic that the epidemic will be brought under control soon in most other regions of the world, and therefore, there are still challenges and uncertainties in economic growth in the future. Looking forward, under the complex and volatile external environment, the Group will continue to pay close attention to the market and industry dynamics, convert stress into motivation, seek opportunities in the midst of challenges, overcome all kinds of challenges, aggressively explore innovative business models and focus on business transformation.

- (i) By centering on the core strategy of "Two entrances, one platform", the automotive diagnosis and Internet of Vehicles will be used as the entrances to establish an open and unified automobile Big Data platform. With the application of new technologies such as big data, artificial intelligence, blockchain and 5G, the Company will explore innovative business models, cooperate with partners in creating an automobile service ecology and developing automotive data business.
- (ii) Continuous investment in research and development to improve core competitiveness.
 - Adhere to the innovative-driven development, invest in research and development continuously and conduct functional upgrade in accordance with the industry policies and market demands in a timely manner and enhance the comprehensive competitiveness of products to maintain the core products' leading position in the market.
 - Achieve Five-zations, namely "internetization, intellectualization, ecologization, platformization and blockchainization", by research and development of devices.

- (iii) Actively expand new business sector to create new growth points
- with a series of measures including the establishment and improvement of software store functions and applications, optimized software sales and upgrade, diagnostic software income will be comprehensively improved.
 - the comprehensively integration of diagnostic products and remote diagnostics platform creates an integrated super diagnostic high-end solution and innovate the user experience.
 - by accelerating the penetration in comprehensive functional industry customers such as government authorities, vehicle operating organization, automobile training and education institutions, second-hand car trading platform and insurance companies, constantly trying the realization of data and empowering the industry customers, the Company will promote the continued growth of revenue in industry diagnostics business.
- (iv) Promote global business coverage to further increase the proportion of overseas market revenue and market share of the Group.
- (v) Strengthen supply chain management and construction to improve product quality and increase customer stickiness.
- (vi) Continue to enhance human resources, strengthen talent training and sustainable development to comprehensively increase the per capita output.
